Summary

Frontend Developer with hands-on experience building scalable web applications and interactive user interfaces using React.js and Next.js. Proficient in integrating real-time features, handling complex state management, and utilizing modern UI libraries to deliver seamless, high-performance user experiences.

Education

Polytechnics Cilacap State

Informatics Engineering • 3.48/4.00
Cilacap, Central Java, Indonesia • 2023 - Present

Studying Informatics Engineering with a focus on software development and web technologies. Gained practical experience in building responsive web applications using React, Next.js, and Tailwind CSS. Learned fundamental concepts in programming, data structures, and system design. Worked on academic and personal projects involving frontend development, API integration, and basic machine learning implementation.

Experience

Coding Camp 2026 by DBS Foundation

February 2026 - Present

AI Engineer Cohort

Implemented basic machine learning workflows such as data preprocessing and model training using TensorFlow. Developed simple API endpoints with FastAPI to serve model predictions. Conducted small-scale experiments in Google Colab to explore model behavior and improve understanding of machine learning concepts.

PT Wiratek Solusi Asia

Purwoketo, Banyumas, Central Java, Indonesia

Frontend Developer Intern

July 2025 - January 2026

Developed and maintained frontend features for enterprise-level applications, including the PLN IG and PLN NP projects. Engineered interactive chatbot systems, specifically HC-Analytics and HR-Assistant, utilizing React.js. Additionally, implemented real-time bidirectional communication via [Socket.io](#) and effectively managed complex application states using Zustand to deliver seamless and high-performance user interfaces.

JKB Learning Center by Himatris

Cilacap, Central Java

Frontend Mentor

April 2025

Mentored university peers in fundamental frontend development, focusing on core concepts like HTML, CSS, JavaScript, and basic of ReactJS. Guided participants through hands-on coding exercises and simple debugging to help them build a solid foundation in web programming.

Projects

Hisho AI

October 2025 - December 2026

- Refactored and optimized complex frontend architecture for a Japan-based web application to improve overall UI performance.
- Enhanced chat streaming functionalities for seamless real-time data delivery and resolved intricate rendering logic for dynamic calendar features.

Lentera - PLN AI Agent

August 2025 - January 2026

- Built the interactive frontend interface for an AI-powered agent, focusing on responsive design and seamless user interaction.

Health Analytics - PLN Nusantara Power

August 2025 - January 2026

- Developed data-driven dashboard interfaces to visualize complex analytics, ensuring high performance and accessibility.

Skills

Frontend Development

Skilled

React.js, Next.js, TypeScript, JavaScript, Zustand, TailwindCSS

AI Engineering

Beginner

Python, TensorFlow, FastAPI, Google Colab, Keras

Languages

Bahasa Indonesia

Native

English

Intermediate
